* Task Types:

Type	Sample Activities
Planning	Determination of project requirements; estimation of required time and program size
Design	Determination of needed program modules; development of UML models; assignment of tasks to team members
Code	Implementation of design; documentation of code; preparation of user documentation
Code Review	Examination of code by manually stepping through it line-by-line to determine correctness of the logic
Compile	Identification and correction of all syntactical defects within code
Test	Preparation of test cases prior to coding; attempting test cases after coding; identification and correction of all semantics defects
Post-mortem	Reflection of project success and completion of all required assignment documentation (logs, etc.)
Preparation	Examination of preparatory material such as book chapter and online references

CS325 Product Planning Sheet

†Size is used as appropriate to the task type – specify units along with amount. For design, it represents the number of UML diagrams (including use cases). For coding, it represents Lines of Code (LoC). For Code Review, the number of modules reviewed. For test, the number of test cases.
